

# You Walk Away

tyDi

With the night behind you  
You walk away, and I will find you  
We are locked in this emotion  
We will find the way home

And it's too late  
To regret the mistakes we made  
Easier to walk away  
And it's too late  
To remember all the words we say  
Nothing will ever be the same

When the world surrounds you  
You take your place with me, behind you  
These are every word unspoken  
This is our way home

And it's too late  
To regret the mistakes we made  
Easier to walk away  
When the world surrounds you  
You walk away...

And it's too late  
To regret the mistakes we made  
Easier to walk away  
And it's too late  
[To remember] all the words we say  
Nothing will ever be the same

And it's too late  
To regret the mistakes we made  
Easier to walk away  
You walk away...
