

You Walk Away

tyDi

With the night behind you
You walk away, and I will find you
We are locked in this emotion
We will find the way home

And it's too late
To regret the mistakes we made
Easier to walk away
And it's too late
To remember all the words we say
Nothing will ever be the same

When the world surrounds you
You take your place with me, behind you
These are every word unspoken
This is our way home

And it's too late
To regret the mistakes we made
Easier to walk away
When the world surrounds you
You walk away...

And it's too late
To regret the mistakes we made
Easier to walk away
And it's too late
[To remember] all the words we say
Nothing will ever be the same

And it's too late
To regret the mistakes we made
Easier to walk away
You walk away...
