

## Pink And Black

Tyler Hilton

So, yea, you said you heard this one  
Maybe lived it twice  
But with bias on my side

I swear I've got a different one  
To be laid to line  
And with a dime for your advice

You never saw a man  
Make a fist and grab so fast he said

Good luck you know you better just forget it  
Cause love is never in the same place that you left it

I said you wouldn't understand  
This was long-term love  
She was perfectly described

And what she wore when we last met  
It was pink and black  
A study in scarlet up inside

You never saw a man  
With bigger eyes that understand  
He said

Good luck you know you better just forget it  
Cause love is never in the same place that you left it

You never saw a man  
With bigger eyes that understand  
He said

Good luck you know you better go and get it  
Cause love is never in the same place if you left it

He said good luck you know you better go and get her  
Cause love is never in the same place if you left her
