

# Wishful Thinking

Tynisha Keli

Verse 1:

I knew from the start  
That this would be an uphill climb  
But i did it anyway  
Hoping a change of heart  
would somehow appear and we'd be okay

Hook:

I must of been asleep making deciscions  
I woke up feeling different  
It wasn't what I was asking for  
Said we got potential of forever  
But still we're not together  
Don't know what i'm waiting for  
When I know that it's all...

Chorus:

Wishful Thinkin  
That's all it ever was  
Just a fictious love  
Wishful Thinkin  
I want to live back on earth  
Cause in the clouds I keep getting hurt  
I'm not gaining a thing  
Living inside of my dreams  
Of what I thought we would be  
It was just  
Wishful Thinkin  
Wishful Thinkin, got me stuck

Verse 2:

Stuck between a wall and rock  
Cause I still want you even though  
You pulled a hit and run  
Now it's gone too far  
Our hearts been hoping for too long  
That one day will come

Hook 2:

If you change up your decision  
To make this love official  
Am asking for just a little more  
Said we got potential for forever  
But still we're not together  
Don't know what i'm waiting for  
Cause all it was...

Chorus:

Wishful Thinkin  
That's all it ever was  
Just a fictious love  
Wishful Thinkin  
I want to live back on earth  
Cause in the clouds I keep getting hurt  
I'm not gaining a thing  
Living inside of my dreams  
Of what I thought we would be

It was just  
Wishful Thinkin  
Wishful Thinkin, got me stuck

Bridge 2x:  
As of right now  
I'm making some changes in my life  
Loving you is all wrong  
but i look for ways to make it all right  
Got to wake up, wake up, wake up  
It's time I let this go  
Wake up, wake up, wake up  
I got to let you go

Chorus:  
Wishful Thinkin  
That's all it ever was  
Just a fictitious love  
Wishful Thinkin  
I want to live back on earth  
Cause in the clouds I keep getting hurt  
I'm not gaining a thing  
Living inside of my dreams  
Of what I thought we would be  
It was just  
Wishful Thinkin  
Wishful Thinkin, got me stuck
