

You And Me Against The World

Tynisha Keli

Intro (Talkin'):

They say if ya heart is open,
Love will always finds its way in.
Now that it;s here,
I fear nothin'.

Ohhh Oooh (Corner Boys) Yeaa

It all started off hangin' out doing what lovers do
When they're on their way to fallin' in love
Everybody said leave you alone
Girl he's no good for you
But they can't judge what they don't know
Cause when I'm with chu your all I see
And when you touch me my body goes weak
Your such apart of my idenity.
That without chu
There's no me
No no nooo

What were my dreams are now reality
You say all the things that I'm about to speak
No one can ever change the way I feel
Baby it's you and me against the world
It's ride or die till the very end
Till the tires pop I'll be your second skin
Your my man no doubt that I'm your girl
Baby it's you and me against the world.

They can hate on us if they choose
No matter what they do
It's gonna be me and you forever
The way you love me is unnatural
Like I'm the only girl who was existing in your world
I can't picture my life without you
You been by my side the whole way through
The chances i'll find somebody almost like you are
Is a million to one
So this battle is won because

What were my dreams are now reality
You say all the things that I'm about to speak
And no one can ever change the way I feel
Baby it's you and me against the world
It's ride or die till the very end
Till the tires pop I'll be your second skin
Your my man no doubt that I'm your girl
Baby it's you and me against the world.

Bridge:

I'm here stay
I ain't goin nowhere
You just hold me tight
Dont ever let me go
Our love is to blame

For the way everyone hates us
But it's okay
Because you make it invisible

Chorus:

What were my dreams are now reality
You say all the things that I'm about to speak
And no one can ever change the way I feel
Baby it's you and me against the world
It's ride or die till the very end
Till the tires pop I'll be your second skin
Your my man no doubt that I'm your girl
Baby it's you and me against the world
