

# A Way Out

Tyrone Wells

I know that look upon your face  
When you're a thousand miles away  
You turn in to the ghost of someone that I know  
It hurts to see you so low

If you can't find a way out this time  
And you can't find the way to calm the storm that's in your mind  
Step back from the edge, get out of your head  
It's all gonna be all right  
We can find a way out, a way out  
We can find a way out, a way out this time

You're out there fighting your own war  
I see you drowning but I'm stuck here on the shore  
You gotta know I'm on your side  
My arms are open wide here to catch you every time

If you can't find a way out this time  
And you can't find the way to calm the storm that's in your mind  
Step back from the edge, get out of your head  
It's all gonna be all right  
We can find a way out, a way out  
We can find a way out, a way out this time

When you're cold, when you're weak, when you're down on your knees
