

Along The Way

Tyrone Wells

I want to be your jacket
Your shelter now
I want to be your laughter
When you're feeling down, down

It's cold out there where you are
You're just getting by, so far
If you just try with me
Maybe in time you'll see
I want to be everything you lost along the way
The song that you used to sing
And your favorite dream
I want to be everything you lost along the way
I want to be everything you lost along the way

I want to be your island
Your rest and peace
I want to be your silence
Surround you while you sleep, just breathe

You stopped where you fell before
You don't want to hurt anymore

If you just try with me
Maybe in time you'll see
I want to be everything you lost along the way
The song that you used to sing
And your favorite dream
I want to be everything you lost along the way
I want to be everything you lost along the way

Maybe you're afraid of love and you'll move on
Before you're too far gone
But maybe you should just wait for once
'Cause we're almost, we're so close

And if you just try with me
Maybe in time you'll see
I want to be everything you lost along the way
The song that you used to sing
And your favorite dream
I want to be everything you lost along the way

If you just try with me
Maybe in time you'll see
I want to be everything you lost along the way
The song that you used to sing
And your favorite dream

I want to be everything you lost along the way (x4)
