

# The Most

Tyrone Wells

I spun the world around  
Said "anywhere you want to choose"  
Just put your finger down  
And I will fly away with you

Now we're on the wind  
And the storm begins  
You're scared of the dark horizon  
But don't be afraid to fall  
I'll be here..

When you need me, when you need me,  
when you need me the most  
when you need me, need me the most  
I'm always here for you,  
no you are not alone  
When you need me, when you need me,  
when you need me the most

Midnight I'm fast asleep  
2,000 miles away from you  
you're crying as you bleed  
You wake me up and break the news

how do you start again  
when the whole world ends  
there's nothing that makes this right  
but I'm on my way tonight  
I'll be here

When you need me, when you need me,  
when you need me the most  
when you need me, need me the most  
I'm always here for you,  
no you are not alone  
When you need me, when you need me,  
when you need me the most

Any time, every time

When you're on the wind  
And the storm begins  
Don't be afraid to call  
I'll be here

When you need me, when you need me, when you need me the most  
I'm always here for you,  
No matter how it goes  
When you need me, when you need me,  
when you need me the most

When you need me, when you need me, when you need me the most  
I'm always here for you,  
No you are not alone  
When you need me, when you need me,  
when you need me the most
