

Dead Meat

Tysondog

Iron maiden calls your bluff
Stands in line to do her stuff
Fools believe the lies she spun
Fly the flags for she's the one
A lying deceiver
But fools believe her
She can't revive dead meat

Promised favours broke in two
Looks your way but sees right through
Thought her different you knew best
Shuttered eyes just like the rest
They're all the same, they share the blame
They still can't revive dead meat

Won't be broken stands her ground
Won't give up the power she's found
Drags a nation to it's knees
Only she knows what she sees
They're all the same, They share the blame
She still can't revive dead meat
