

# Heavy Rain

U.D.O.

Nothing could prepare me for the truth How could I believe, I hope I was of use Didn't realise I'd played the fool You were the devil in disguise Your poison made me die

You're like heavy rain Always feels the same You're like a dagger in the night You always make a lie Out of everything You're like heavy rain You bring a tear to my eye I wish that you could fly back into heavy rain

Bleeding from the arrow to my heart You did the dirty deed, you tore my soul apart Left me like an addict in the dust You crawled inside my skin You left me cold and crushed

You're like heavy rain Always feels the same You're like a dagger in the night You always make a lie Out of everything You're like heavy rain You bring a tear to my eye I wish that you would fly back into heavy rain

The future's not so bright I'll have to learn to fight The likes of you I'll find an open road And bare this heavy load from you From you
