Hell bites back Hell bites back You'll do the time And that's a fact Your lesson has begun No prison life Can offer back You gotta walk the line to come Now comes the time when the payment is due Now it's the time to go on I know that Hell bites back Hell bites back It may be right It may be wrong When they close your door You'll hate the day And fear the night You gave the finger to the law Never surrender - cover your back Nothing to stop a stab in the back Never give in - never give out Better be good - never get out
