

Baby Blue

UFO

Bet you never thought that time would go so fast
Bet you never thought a memory would last
Is it wrapped up in boxes with your old fashioned crazies
Packed all away with life's scars and grazes
Hey baby blue
I still remember you,
Still remember you
In my life
Hey baby blue
Where you running now,
Where you running now
In your own life
Going round and round and round
In my little world
Going round and round and round
In my little world
Everytime I saw your face
There was magic in the air
I see a sunny San Francisco morning
Baby you meet me there
Sometimes I'm left wondering
Sometimes it makes me so blue
Let me take you down to Mexico
Cos I'm still in love with you
Everytime I get to thinking, thinking of you
Under a sweet corrella, does it burn you too
And if sometimes I wonder when,
When sleep don't come at night
I still move and I groove and I jump and shout
Oh God I'm still in for the fight
Hey baby blue
I still remember you
Don't leave the world behind
Leave the world,
Leave the world behind
Solo
Going round and round and round
In my little world
Going round and round and round
In my little world
Hey baby blue
I still remember you,
Still remember you
In my life
Hey baby blue
Where you running now,
Where you running now
In your own life
