## **Crossing Over**

I see the lights, I see the road I see everything in the Highway code I've been whipped And I've been spun cown There ain't no religion here And I'm homeward bound Wherever you go, Wherever you are I am crossing over To the other side And now I am waiting for an answer, Some kind of sign Looking for a love To be my guide I am crossing over To the other side Friendships come And lifetimes go In their passing to the Bigger show The river runs, The tides will turn If there's a hell, Well I've yet to learn Wherever you go, Wherever you are I am crossing over To the other side And now I am waiting for an answer, Some kind of sign Looking for a love To be my guide I am crossing over To the other side To dream the dream that's over Before it's gone To hold your lover here While your heart beats so strong Baby when I love you When everything is gone When I'm kissing heaven This love is never wrong [Solo] I hear the singing, I hear the shout The talk of meaning For those in doubt But amid all the wailing and The wringing hands Everybody thinks Does anyone understand? Wherever you go, Wherever you are I am crossing over To the other side

And now I am waiting for an answer, Some kind of sign Looking for a love To be my guide I am crossing over To the other side I am crossing over To the other side And now I am waiting for an answer, Some kind of sign Looking for a love To be my guide Cos I am crossing over To the other side
