

Long Gone

UFO

Skulking in the mean streets whispering in the halls
Redlight bandits on the corner give no quarter calls
Infectious garbage fills the streets and in their eyes you know

A thin blue line bends and breaks stop the overflow

(1) Fan the flames of the city's heat

In dark corners hiding never seen

Desperation and the trouble flares

Alarm guns ring running scared

And you're long gone, down in this hell

Long gone down in this hell

So baby won't you hold me tight

Let your softness fill my night

We've got a dream don't let it slip away

'In your eyes I can see the fear

This town never sheds a tear

We're gonna be /out someday/walking away

Keep on looking for a holy one,

Some kind of hero or a prophet to come

Visionaries dance your night away

There's no tomorrow living for today

But you're long gone down in this hell

Long gone down in this hell

[Instrumental]

I saw the stars come out tonight so lonely and immune

Summer rain kissed the streets that bleed like open wounds

Patrol cars sweep the avenues down on Forty Eighth

While faces in dark doorways wait around the hate

(1) Repeat

(2) Baby better walk away

Baby better walk away

We'll be busting out someday

(2) repeat
