## **Young Blood**

Young blood where you going now Young blood where you going now I didn't mind it when you left me honey But I miss you ain't the truth I haven't give up hanging on the phone But all I hear is the Proof \*One more night and I'm thinking what's going wrong You say you love me but Does love take this long You paint a picture you tell a story Oh the tangled web that you leave I hear the whispers the candid talking Arid I don't know what to believe (Repeat\*) \*\*Where do all these dreams have broken Right or left it's stolen Stop your running away Young blood ooh tell me Where you going now Young blood ooh tell me Where you going now It's never never nothings forever Turning gold in our hands There's no magic it all seems tragic 'Cause it's slipped through our fingers like sand (Repeat\*) (Repeat \* \* twice) Run run running away
