

# The Takedown

## Ugly Duckling

The blood starts pumping, the mind's alert  
The goal is in focus, time to work  
I've got raw nerves and a loss for words  
So you better not knock, do not disturb  
My heart palpitates insatiable  
Follow my nose, aimed at a place to go  
On the path I'm a pack of jungle cats  
Who can hunt as long as the hunger lasts  
I'm looking for a yes and I hate resistance  
You can break it down to the basic instincts  
Not gonna wait, better make it instant  
Or else stand back at a safer distance  
(Shhh) demons whispering  
A little idea telling me it's the thing  
So I dive down deep to apply surprise  
Like a great white killing with lifeless eyes  
I might try to stop but I'm out of control  
And I'm not cooling off so now that you know  
Don't allow me to blow cause I doubt I can hold  
And I'm about to (ahhh)

You better give it to me  
It's the take down  
Give it to me, give it to me, give it to me  
I'll take you down

Deep down inside you know you're wrong  
Ah man, just relax, it's not that bad  
Cause you took it too far and it's time to stop

Wait, take one minute to think  
You gotta stay calm, you're on the brink  
Of disaster, pause and catch yourself  
Let's make some calls and get some help  
You need to understand what a mess you're in  
Before I notify your next of kin  
It's not that bad, your life's a wreck  
And I came to serve the reality check  
You think that you're slick and sliding by  
When you sit there sipping on cyanide  
With the people in your life left high and dry  
And don't try to hide those lying eyes  
What do you know, I know you're wrong  
I know that it's bad and it can't go on  
Well what do you want me to do, admit it  
Admit it, tell me that I'm right, forget it  
I'm out of here and if I burn a bridge (bleep) you  
I don't know if I'll return to this  
See, It's too late to manipulate  
A twist of fate and a lucky break  
I am what I am, not a role I can act  
And there's no going back and you don't know the half  
So if you want to judge and find a fault  
I'll bring this talk to a grinding halt
