

# No One Survives

Ugly Kid Joe

Made a hole in the sky  
Just to watch the world die  
But the sun came in  
And showed them how to live again  
They left me here alone  
With no way to get home  
I watched it all begin  
And this is where it ends

They say the world is alive  
But long ago we all died  
Life is a suicide  
That everyone tries to justify  
So get in the back of the line  
Cuz happiness you'll never find  
And in the end  
No one survives

So I poisoned the sea  
Just to watch the world bleed  
But the rain came in  
And made the water clean again  
They left me here alone  
With no way to get home  
I watched it all begin  
And this is where it ends

They say the world is alive  
But long ago we all died  
Life is a suicide  
That everyone tries to justify  
So get in the back of the line  
Cuz happiness you'll never find  
And in the end  
No one survives

And all your days are over  
And all you can remember  
That's nothing new we met before

Made a hole in the sky  
Just to watch the world die  
But the sun came in  
And showed them how to live again

They say the world is alive  
But long ago we all died  
Life is a suicide  
That everyone tries to justify  
So get in the back of the line  
Cuz happiness you'll never find  
And in the end  
No one survives
