

The Enemy

Ugly Kid Joe

All my life I've been wastin' away
Never thought there'll be hell to pay
My heart is broken cause I've never been true
To myself or the rest of you

Never stopped just playin' it cool
The life I lived I was such a fool
Finding a world but losing my mind
It was all just a waste of time

The enemy is us, the enemy will bring you down
The enemy will make the sound that you never heard before
There's nothing you can do, not even if you wanted to
Are they really comin' after you, are we entering the storm

I remember how we'd used to be
Now my life throws away from me
So many things I did over the years
The pain I caused and all of the tears

Never stopped just playin' it cool
The life I lived I was such a fool
Finding a world but losing my mind
It was all just a waste of time

The enemy is us, the enemy will bring you down
The enemy will make the sound that you never heard before
There's nothing you can do, not even if you wanted to
Are they really comin' after you, are we entering the storm

Sealings are crazy
Cause you now laugh in fear
And they want him to make it better
But there's nobody there
All my life I've been wastin' away
Never thought there'll be hell to pay
My heart is broken cause I've never been true
To myself or the rest of you

The enemy is us, the enemy will bring you down
The enemy will make the sound that you never heard before
There's nothing you can do, not even if you wanted to
Are they really comin' after you, are we entering the storm

The enemy is us, the enemy will bring you down
The enemy will make the sound that you never heard before
There's nothing you can do, not even if you wanted to
Are they really comin' after you, are we entering the storm

The enemy is us, the enemy will bring you down
The enemy will make the sound that you never heard before
There's nothing you can do, not even if you wanted to
Are they really comin' after you, are we entering the storm
