

## Black and Blue

Uh Huh Her

All my ways are covered, faded  
But I will follow through  
Anyone would tell you not to  
But they're just jaded

Carry me to another place  
I don't know which way to go  
All my insides are black and blue  
From killing you

I can feel another surge, we're undercover  
Take it to the next level, please don't give it to  
another  
All this time I've searched myself, tell me which way  
to go  
But still your love is killing me, I'm black and blue

I'm loving chase baby  
I'm loving chase the night away  
I'm loving chase baby  
I'm loving chase

I'm loving chase baby  
I'm loving chase the night away  
I'm loving chase baby  
I'm loving this game

I took it all for granted darling  
I'd do anything to take it away, take you away  
Now this is the final hour, I'll give you your key back  
to your heart  
It's for another

I'm loving chase baby  
I'm loving chase the night away  
I'm loving chase baby  
I'm loving chase

I'm loving chase baby  
I'm loving chase the night away  
I'm loving chase baby  
I'm loving this game
