

## Never The Same

Uh Huh Her

It's not your fault  
it was me who chanced it all  
You whispered to my heart  
And i'm forgiven

I weigh my fate  
Give me one more chance to say  
You left before I ever said I'm sorry  
Your eyes they glisten in the sun  
Believe me you're the one  
I think you feel the same  
Relieve me of this heartache

I've been missing your smile  
And I wish you were here  
And I'll never be the same when you're gone  
I've been missing it all  
And I wish you were here  
And I'll never be the same when you're gone

I've let you down  
But it's spun right back around  
I'll never throw away what you have given  
I lay awake  
And I dream of yesterday  
I lost of everything that I had treasured

My heart listens to it all  
Don't catch me when I fall  
I think I'm must again  
Relieve me of this heartache

I've been missing your smile  
And I wish you were here  
And I'll never be the same when you're gone  
I've been missing it all  
And I wish you were here  
And I'll never be the same when you're gone

I've been missing your smile  
And I wish you were here  
And I'll never be the same when you're gone  
I've been missing it all  
And I wish you were here  
But I'll never be the same when you're gone
