Follow Me

Ultimatium

I'm drifting away, I obey the call I'm leaving this place, Now it's once and for all I won't ask more, You taught me the rhymes That open the door, To your paradise

I'm leaving it all, I'm leaving my past I need you to hear my call

Follow me, and your sky won't get dark Follow me, you'll be safe from the shark Follow me, to the place of your dreams Follow me, to another reality

Now I am here, Dimension four With out the fear, Of being left alone You hear my call, We'll soon unite Now heal my soul, In your paradise

We both left it all, we both left the past And now we both hear that call
