

# In Winter Nights

Ultimatum

On the edge of the mountain cliff

I'm standing wondering again

This beauty of the night

The dark clad in white

A world all dressed in snow

Shining brightly in the night

I just look upon the dark horizon to find my way

In winter nights ride like the wind

A flame in my heart keeps me alive

Across the forests and highest mountains

My spirit flies free in the light of the moon

In winter nights

Cold north wind that chills my face

I keep on traveling the lands

Of darkened winter

Riding the silver fields

A queen all dressed in snow

Sining brightly in the night

I just look upon the dark horizon to find my way

In winter nights ride like the wind

A flame in my heart keeps me alive

Across the forests and highest mountains

My spirit flies free in the light of the moon

Look upon the dark horizon to find your way

In winter nights ride like the wind

A flame in my heart keeps me alive

Across the forests and highest mountains

My spirit flies free in the light of the moon
