

# Through Winterland

Ultimatum

Through the land of cold

The Valley of the Northern wind I walk

And the starlit sky's my only guide

To whom I now can talk

In the Darkness of the winter night

Shining stars light up the sky

Northern Star, My guide

Explain me why I now have to go through

All this suffering and Pain

As I know my days left are few

On this journey that I can't explain

Through the lands of frozen rain

Northern star, would you guide my way

Through winterland of my dreams

I have to travel so far away

To face my destiny in life, oh why

Through Winterland

I see the light coming down from the sky

I see angels, they cry 'cause their wings cannot fly

Fallen star that once guided me

Lays there full of scars, Just a memory

I'll fight my way

Through these stillborn days

With pride on my face

I will win this race

For life

And when I come back home

The light will wash the lands of the north

The smile of the moon that brings me alive

Carries me to the light

When the shadows leave and kill the night

Sun rolls in and turns earth bright

Northern star, would you guide my way

Through winterland of my dreams

I have to travel so far away

To face my destiny in life, oh why
