

Back To The Future

Ultraviolet Sound

I'm digital

Back to the future we go
Back to the future we go

Under the radar I go
To another dimension you know
Leave all the present behind me
Put in my tape
And rewind me

Take me back back back to the future
Living in digital
A new wave attack moving through ya
Back to the future we go

Back to the future we go
Back to the future we go

Back to the future again
Stealing the sound of science
Causing a fatal attraction
Under your skin
A chemical reaction

Take me back back back to the future
Living in digital
A new wave attack moving through ya
Back to the future we go

Back to the future we go

Hold up wait a minute
Put a little Love in it

I roll on my own tempo
Sometimes my shit goes solo
Polysonic, supersonic I'm gonna rock rock rock it
Old school 8-bit analog nine
here's the last line give 'em a rewind
I'm digital
I'm busting out like a criminal
I put on my shades 'cause the future's bright
Ultraviolet
I like it
I like it

Take me back
Take me back

Take me back back back to the future
Living in digital
A new wave attack moving through ya
Back to the future we go

Back back back to the future
Back to the future we go

Back to the future we go
Back to the future we go

Back to the future we go
Back to the future we go
