All in One Day

Strange how the change came all in a day Counting down and counting down And waiting for the minute We could touch a world Where every heart had love to offer

Heart-felt passion building around Feel the love, feel the love Sharing the strain From where apathy reigns For a dying world

All in one day All in one day When the hands reached out Across an ocean Everywhere

All in one day All in one day When the people came And stood together Everywhere

All in one day All in one day When the hands reached out Across an ocean Everywhere

All in one day All in one day When the people came And stood together Everywhere Everywhere
