

## Maximum Acceleration

Ultravox

I thought you knew me by now  
Let the lights go on roaring  
Someone's hand on my shoulder  
Then whip past the turning point  
There's time for the taking

Maximum acceleration  
Maximum acceleration  
Maximum acceleration

A face that goes slowly  
A signal close by me  
The landscapes are changing  
And some of us flipped a coin  
And shimmered away

Maximum acceleration  
Maximum acceleration  
Maximum acceleration

You really were aching  
It's turning to twilight  
Moving over and under  
Then a couple of figures  
Shook their heads of the high lines

Maximum acceleration  
Maximum acceleration  
Maximum acceleration
