The Best of Me

Underoath

In my mind you never left Falling wasn't true I had faith you flew past the sky Straight through the night And the sun reflects the night Carrying the very same thing In your heart that saved me But maybe you've stopped listening Falling on my selfish ways It takes faith to see So close your eyes and search Deeper than just memories I never stopped believing in you and me Your leaving never changed things I've been here for too long To just walk away
