

# Night of the Long Knives

Unisonic

Gonna take this place  
Drawing up the blueprint in his head  
The time has come for a rule under the gun  
And thy will be done by order of the one

He's got a list on his mind

There is talk on the street and it's driving him crazy  
There's a lesson to learn but it's not gonna save them  
Doesn't care about danger cuz he's out of time  
Got to call on the guardians  
He's gotta keep the plan alive

A marching union, vow to the oath  
Carry out a message of fear  
Into a cell, they're gonna take you to hell  
The prophecy will unfold

Night of the long knives  
For power they do strive  
An allegiance sworn to keep their master  
Safe from rival harm  
Night of the long knives

Soon the henchment return from the purge of the nation  
Then is given the word to being liquidation  
Like a turn of the page it was said and done  
And a hundred of minions were executed one by one

A marching union, vow to the oath  
Carry out a message of fear  
Into a cell, they're gonna take you to hell  
The prophecy will unfold

Night of the long knives  
For power they do strive  
An allegiance sworn to keep their master  
Safe from rival harm

Night of the long knives  
The master must survive  
Operations silencing the nemesis of the command

Take hold and clench your fist  
Striked a deal that they can't resist  
But in the end when the damage is done  
Start counting all of your losses

Night of the long knives  
For power they do strive  
An allegiance sworn to keep their master  
Safe from rival harm

Night of the long knives  
The master must survive  
Operations silencing the nemesis of the command  
Night of the long knives

It's the night of the long knives
