Too much love
I got too much love
As a vision slides
I got too much love
I got too much love
As emotion dies

You figure there's time
For a man to run
You figure there's time
For the falling stars come down on us

Run run run till you think you're made Run run run till you're told you're safe Run run run till you're overcome Run run run you're the only one

I got too much love Don't deceive me now As the color slows I got too much love For a glitter doll For the rainfall

You figure there's time
For a man to run
You figure there's time
For the falling stars come down on us

Run run run till you think you're made Run run run till you're told you're safe Run run run till you're overcome Run run run you're the only one

Run run run till you think you're safe Run run run till you're told you're made Run run run till you're overcome Run run run you're the only one

Don't step down

I got too much love For the glitter doll And my emotion slides In another end In another life I was on your side
