Your skull-fucked little lives In shadows where you hide A life that was designed You've been cheated oh so blind You laid it on the line These twisted words of time And how your spirit shines I wish that you were mine Yeah lately I know that I've been crawling I know that I've been falling Into your dream Imagine no more tears Dissolving all your fears With tooth and claw we fight Into this endless night Yeah lately I know that I've been crawling I know that I've been falling Into your dream I saw my tears in your eyes You saw your fears in mine We watched it burn together Watched it burn together Burn yeah, burn watched it burn burn yeah burn Watched it burn, burn watched it burn Watched it burn, burn watched it burn All is forgiven.
