## **Destroy Me**

## **Unter Null**

I know you despise me But what can I do? You once said you loved me I took it as truth

I know you'd destroy me With your very first hit But it's already done I'm too scared to admit

The mindgames are timeless The angish won't end I've tried to repair the things that won't mend The heartbreak is caustic The rancour lays deep I thought I would fight the battle so steep

I know you resent me With my every breath I'm sorry, I'm trying I'd fight to the death

I know you ignore me To punish my past To tarnish my future I thought it would last

You'll take no more I'll rise from it all You'll see that I'm not who I was anymore You can't tear me down You can't bring me pain I will never be the martyr again.
