

# Dim The Headlights

URBANDUB

It starts with a stare  
We're both well aware  
You're pulling me closer  
Pulling me in

Eyes locked eager to sink in my teeth for the taste of your sin  
The nights blaze from heat of exchanges  
Times fades so drive me away

Dim the headlights the streets are open  
Once dark skies burst in orange and blue  
Sit still on your passenger side and watch you drive me to fall in love

We fall in love

And when you speak it leaves me weak  
In the days and days I'm lost and I am craving more  
Yes you can touch me easy

The night blaze from heat of exchanges  
Time fades so drive me away

Dim the headlights the streets are open  
Once dark skies burst in orange and blue  
Sit still on your passenger side and watch you drive me to fall in love

And if I lost you I've lost every piece of me inside you  
With every taste of me that you take I break just

A little bit more  
A little bit more  
A little bit more  
A little bit more  
A little bit more

The night blaze from heats exchanges  
Time fades so drive me away

Dim the headlights the streets are open  
Once dark skies burst in orange and blue  
Sit still on your passenger side  
And watch you drive

Dim the headlights  
We fall in love
