

Never Will I Forget

URBANDUB

If you got time to spare, I've thought we'd talk
It's been a long time, let's reminisce
Go over, past pictures, freshening our minds

Through all the heartbreak songs you sang along
Through all the roads i crossed and came along
Just a little emotion, the future is brightening

Long time no see, I have been waiting
A long time to be away from each other
It's been a long time, but I still remember us
I still remember

And with these eyes I see that life has done you well
You've seized and captured every moment
Life's mysteries unfolded
After the darkness, light will come along
And all the pain it caused are good and gone
Just a little emotion, the future is bright

Long time no see, I have been waiting
A long time to be away from each other
It's been a long time, but I still remember us
I still remember

We chased away the clouds and rain
The sun refills its warm embrace

If you got time to spare, I've thought we'd talk
It's been a long time, let's reminisce
Saying let's reminisce, saying let's reminisce
Through all the heartbreak songs (never will I forget)
Through all the heartbreak songs you sang along

Long time no see, I've have been waiting
A long time to be away from each other
It's been a long time, but I still remember us
I still remember

Long time no see, I still remember us
I still remember
I still remember us
I still remember us
