Never Will | Forget

URBANDUB

If you got time to spare, I've thought we'd talk It's been a long time, let's reminisce Go over, past pictures, freshing our minds

Through all the heartbreak songs you sang along Through all the roads i crossed and came along Just a little emotion, the future is brightening

Long time no see, I have been waiting A long time to be away from each other It's been a long time, but I still remember us I still remember

And with these eyes I see that life has done you well You've seized and captured every moment Life's mysteries unfolded After the darkness, light will come along And all the pain it caused are good and gone Just a little emotion, the future is bright

Long time no see, I have been waiting A long time to be away from each other It's been a long time, but I still remember us I still remember

We chased away the clouds and rain The sun refills its warm embrace

If you got time to spare, I've thought we'd talk It's been a long time, let's reminisce Saying let's reminisce, saying let's reminisce Through all the heartbreak songs (never will I forget) Through all the heartbreak songs you sang along

Long time no see, I've have been waiting A long time to be away from each other It's been a long time, but I still remember us I still remember

Long time no see, I still remember us I still remember I still remember us I still remember us
