

Stars Have Aligned

URBANDUB

From the outer reaches of our understanding
Stars will align for us
Leaving it all behind, there's fewer to trust
Who will stand and deliver us from harm
Deliver us from harm

Gotta learn to bend it just a little
It's so easy said then done
Once you give in, they will bleed you
Just a little bit more and more

If I were to crash to the ground
Would the hypocrites finally come out
Will the world weep or smile for the sinner
Would they even care for it at all

Gotta learn to bend it just a little
It's so easy said then done
Once you give in, they will bleed you
Just a little bit more and more

Gotta learn to bend it just a little
Got to learn to bend it just a little
Just a little more
Just a little more

If this is what you wanted
Then I'll give you all I got
I aim to please, exchange beliefs
I sell my soul
