

# Night of the Wolf

Uriah Heep

Streets are full of rain  
Lightning cracks the sky  
Hear a lonely cry, eyes full of pain

Searchin' in the darkness  
Eyes pierce the night  
Calling for her young one  
As she walks towards the light

It's the night of the wolf  
Hear the cry of the wolf

Streets paved with gold  
Night gives out a warning  
There's thunder in her heart  
And mother wolf is calling

Searchin' in the shadows  
For the one she must save  
She cries out a prayer  
Like a song from beyond the grave

The bells will toll  
No one will sleep tonight  
While she alone will  
Walk the streets tonight

Sun begins to rise  
All the streets washed with rain  
Still hear her cries  
Eyes burnt with pain

Returning to the twilight  
Betrayed by the night  
Screaming for her young one  
As she walks towards the light
