

One on One

Uriah Heep

People say I run too fast
But they don't understand
I'm livin' out the best of times
The way I always planned
Little girl you got a dirty smile
Come along, walk with me
Down the golden mile
On my tongue the taste of love
Never felt so good

One on one
I could like this forever
One on one
Take me all the way to Heaven
On on one
Love runs in so easily
One on one
All you give is what I need

Stone by stone, frame by frame
We got this love together
No more headache in my heart
No more under pressure
Baby with you I can do anything
Just a touch is not enough
With you it's everything
On my tongue the taste of love
Never felt so good
Easy come
No more waitin' at the back door
