Only Human

Uriah Heep

We're only human...

Keep on fighting Don't let troubles get in your way You can change and turn your thinking To energy so beautiful

We're only human, looking for direction We're only human after all We're only human, wanderers and dreamers We're only human

Deep satisfaction Is there within the magic of life And the laws of your attraction Say everything you need to know

You can't imagine how So many people wasting time We can achieve the love We need so we can shine And see the things that life will Bring us now in perfect rhyme The secret is in you, always within you

Sleep on angel Show us where you go in your dreams And the universe will tell you 'Your wish in life is my command'

We're only human... human... human... We're only human after all We're only human... human... human... We're only human

We're only human...
