

Roller

Uriah Heep

Oh where is she woman
She's only here for the sun
It's now you'll discover
She's only here for the fun
And who will move over
Sweet talker choosin' her side
And it's then, it's all over
She' just along for the ride

She' s a roller
She's just a roller
Bet she'll roll her life away

One town is just like another
One man will just never do
Don't turn around
When she calls out your name
She's gonna break you in two

But she's a roller
She's just a roller
Rolling time come today

One town is just like another
One man will just never, never do
Don't turn around
When she calls out your name
She's gonna snap you in two
