

# Universal Wheels

Uriah Heep

All the fields are  
Smoke and flame, fire in the sky  
It's a state of emergency  
Much more than meets the eye  
Just hide away your tears  
There are many more hidden fears  
As the universal wheels  
Go round n' round n' round

Rivers of pollution  
Taking life from living things  
Running out of oxygen  
There is no way to win  
We ignore the signs of nature  
Got to learn to live beside her  
As the universal wheels  
Go round n' round n' round

Better take good care of  
All the things you say and do  
Round n' round n' round  
Look out for the warning sign  
Now it's up to you

There's a mighty eight point six  
Waiting in the ground  
When she opens up  
This world will humble to the sound  
There is only one real power  
Creating life by the hour  
See the universal wheels  
See the universal wheels  
See the universal wheels  
Go round n' round n' round
