

# We Got We

Uriah Heep

I got you, you got me  
We are where we belong  
Safe places, warm faces  
All have been gone too long

Sky writing, inviting  
Disappears amidst the cloud  
False promise, the last cold kiss  
All seem so distant now

Just with each other  
We are all so well armed  
And with a little care we need  
Never be harmed

We've got we and there's love  
Before our eyes  
We can have it and hold it  
If we realize

But just with each other  
We are, we are so well armed  
And with a little care we need  
Never, no never be harmed

La la la  
La la la  
La la la la  
...
