We Got We

Uriah Heep

I got you, you got me
We are where we belong
Safe places, warm faces
All have been gone too long

Sky writing, inviting
Disappears amidst the cloud
False promise, the last cold kiss
All seem so distant now

Just with each other
We are all so well armed
And with a little care we need
Never be harmed

We've got we and there's love Before our eyes We can have it and hold it If we realize

But just with each other We are, we are so well armed And with a little care we need Never, no never be harmed

La la la La la la La la la la

. . .
