Get Out

Us3

You don't think that I would do what I said that I'd do
You said that you'd be there if I needed you to come through
What's in a word, a word don't matter when it stands on sinking
 sand
Belief is gone you done too much harm, others involved don't un
derstand
Get real you lie, you don't know what honest means
Hey hey hey hey
Get out!

(chorus)
Get out (X 8) go!
You don't know what this means
Having to set you free
Get out!

How did we come to this world that I see myself in?
My trust and love and faith have all been mighty broken
You say you do and then you don't then it's all left up to me
Keep it going all day long while you're out there playing free
Can't take it gotta go now I'm gonna take care of me
Hey hey hey hey
Get out!

(chorus)

I thought that we'd be together 'til the world came undone
But that was before I found out where you're coming from
What's in a word, a word don't matter when it stands on sinking
 sand
Belief is gone you done too much harm
Others involved don't understand
Get real you lie, you don't know what honest means
Hey hey hey hey
Get out!
