

# I'm Thinking About Your Body

Us3

(chorus)

Oh baby I'm thinking about your body  
Oh baby I'm thinking about your face

Pull up a seat let's have a drink and talk  
How'd I find you outta all the women in New York  
You walk and talk so refined, picture you being mine  
I think it's time, but I don't wanna play mine  
So I step to the rear just a little to see if you follow  
Then I know it's a give and take situation  
My time's very valuable, don't wanna waste it, but I can taste it  
Meaning that the future can hold a lot for us  
Things we discuss make Dr Ruth blush, keep it hush  
Put you on a pedestal, treat you like the queen you are  
Never be too far apart from your heart

(chorus)

I can feel her in the party even though I don't see her  
Her vibes and mine intertwine like locks  
At the table I watch  
She's gonna step in my vision, appear like a genie  
Ready to grant my wishes  
Future mother of my seeds indeed we must breed  
And bring forth the cream of life with no fights  
Last through the stormy weather, still together  
'Til death us do part was in my heart from start  
But then there's the pain you get before you gain  
Hold on tight, don't wanna sleep alone tonight  
She reflects my light, in she I see heaven  
When making love I escape from hell on earth  
Intoxicating, I fiend for the touch  
Hush hush is how I keep it, she can't know I'm a lush  
Thinks she knows what I like, reads my mind like a book  
See I'm thinking 'bout her body 'cos she got me hooked

(chorus)

I'm thinking 'bout her body, curves make my vision blur  
Her conversation got me intoxicated  
Trippin' like booby traps, she made my heart collapse  
Perhaps this is not what I really need  
Maybe I might be speedin', in her hands I'm feedin'  
But moms raised no fool, keep it cool and don't drool  
Is it mutual?  
My head is filled with thoughts  
How'd I find her outta all the women in New York?
