

A lie is a falsehood Everybody knows it  
We've come to a crossroads 'Cause I realise that  
Things aren't what they seem And I see a pattern  
Of people and their dreams Regularly shattered  
We trust in our nation That's where we are living  
To allow our elevation Do more than surviving  
No-one asks the question When we need the answer  
Are we in the right direction We don't think it matters  
We wonder why we're in the situation that we're in  
The real truth is we're not paying attention

(chorus)

We're freely marching on to exploitation  
We're blindly moving toward extermination  
Because every lie we hear has a justification  
And the truth we deny is public relations  
You think you have freedom That's what they all say  
But your mind doesn't function Over medicated  
Because of depression Too much information  
And you have no direction Just don't pay attention  
There's so much pollution Some kinda radiation  
Which leads to destruction Everything is wasting  
But political action Everybody rising  
Is deemed a distraction Well well well well  
We wonder what is happening, and how we got into this  
situation

We're not paying attention

(chorus)

You say we need discussion About all our problems  
Then we need protection From those who cause them  
We should be talking preservation For our children  
Which leads to evolution Higher higher!  
There can't be hesitation If we want the real truth  
And no more reservations And you know that means you  
What we need as a nation People come together  
Is a spirit of revolution Around the world  
We don't have to believe the words that they spin  
If we just keep paying attention
