

## Symptoms

Useless ID

You showed no signs of sympathy  
and now the anger takes control  
you took a while to fix it  
but the damage took its toll  
so how do you expect us to coexist  
when you need time out of the box?  
you used to be a mystery  
but now you're overdosed

I, I want your love  
I want your pain  
I want your symptoms

When is obvious to think that the argument  
is something I cannot buy  
I always kinda get the feeling  
that you've got something to hide  
so let your guard down before I let it go  
it's killing me now  
we're stuck here living in the comfort zone  
but I got used to it somehow

I, I want your love  
I want your pain  
I want your symptoms

Did you ever really stop and wonder why  
I pledge these spoils before we try  
Did we ever really stop and ask ourselves if we got symptoms  
I wish we could've move them but tonight we are both victims

I, I want your love  
I want your pain  
I want your symptoms
