

# One Day You'll Be Mine

Usher

Check it out  
Come on  
I'm sayin'  
You gon' be mine

Fist time I saw you baby  
You did something to me  
That no else has ever done  
Oh - it's something in your eyes  
Caught me by surprise  
And told me that you were the one  
Oh - but what's bad is I know you get on man

And he'll never understand  
The chemistry between me and you - Ah baby  
Something inside of me  
It's saying you and I were meant to be  
If you can think it you can have it  
That why I believe

One day you'll be mine (mine)  
No more creepin', sleepin' around  
One day you'll be mine

Now every time I see you baby  
It's plain to see  
That I'm everything you've been missin at  
Home baby  
So much love to share  
It's something in the air  
Tellin' me I should never leave you alone  
But even through  
I know you gotta man  
He'll never understand  
The chemistry between me and you - Ah baby  
You can try to stop it but it won't quit  
You say you don't when you know that you want It  
I know, one day well be mine
