

Breaker, breaker, breaker, this is the space cowboy out here,
And I am four light years away from the planet saturn.
Anybody out there got your ears on?
Why don't you tell me about it?

Hello space cowboy. This is jupiter moon talking at you
From mulitoid space. Got some folks over here on your back door
.
No one over here at your front door. Looks like we got us a
Cosmic convoy.

Ah, tell me something now, we got that jupiter probe out there
Still?

Yeah, right behind you, following you.

Well tell me something, got any word on mr. spock out there?
Is he looking around for us?

Ah, word I get is you better slow down a little bit. I know
He's pushing 19 g's right now, and I think that's a little
Above the limit.

Yeah, I know, I know, I'm rigged up, but I thought I could
Make up a little time here. I lost so much time coming around
The sun.

Yeah I know, scooby doo for me too, sun spots Ok, space cowboy

And I'm putting the hammer down. It's been fun running
With you. We'll see you next century.
