

I Just Want To Touch You

Utopia

There's a flame in the back of my mind
And it's burnin' for you all the time
'Cause I just wanna touch you
Do you want to touch me too?

Now I know that you've heard this before
But with me it could mean something more
And I just wanna touch you
Do you want to touch me too?

Everybody says we're too young
But I know all the things that they just can't see
I just wanna get inside you
If you'll just give a minute to me, ooh

So I've said everything that I can
And I'm hoping that you'll understand
That I just wanna touch you
And you want to touch me too, ooh

Everybody says we're too young
But I know all the things that they just can't see
I just wanna get inside you
If you'll just give a minute to me, ooh

So I've said everything that I can
And I'm hoping that you'll understand
That I just wanna touch you
And you want to touch me too

I just wanna touch you
And you want to touch me too
