

Mad Men In Metal Machines

Utopia

...ignition...the message...faster, faster...
Transmission...engine...he's outa control, look at
The screen there, I can't control the trajectory of
The ship...
Mad men, metal machines

Circa 1995, he did the show, no one's alive
By fall of 1999, look at it shine

Mad men in metal machines
Well look out for the ones with the energy beams

All the joys of working overtime
Slipping into girls and boys

Better make your move before it's too late

Put away your wheelchair and cane, that you don't need
Recall that you've been changed
Relax, relax don't bend your mind

Mad men in metal machines
Well look out for the ones with the energy beams
Look at all those men
Watching everybody on the video screen
Watch out for the ones with the energy beam
